

For Immediate Release**ADVANCED MEDICAL MANAGEMENT ROLLS OUT MICROMD PM
ACROSS 23 LOCATIONS****Groups to Utilize Practice Management Software to Improve Operations,
Reduce Paper-based Processes**

Boardman, Ohio – September 18, 2008 – Henry Schein Medical Systems, a provider of mature and cost-efficient practice management (PM) and electronic medical records (EMR) systems, today announced that Advanced Medical Management (AMM), Inc. will implement MicroMD® PM at 23 Maryland-based locations representing 40 providers.

AMM is an organization that provides management and support services for three high-quality healthcare delivery companies specializing in the care and treatment of injured patients.

“Personal injury cases often involve filing claims with multiple insurance carriers for each accident. We needed a practice management system that would allow us to group all claims and documentation associated with a particular accident to a single patient record to simplify this process—something our previous PM system could not do,” said Michael P. Erway, chief technology officer at AMM. “We chose MicroMD PM because it afforded us this functionality, enabling streamlined workflow and improved access to patient information. The other deciding factor was that MicroMD PM fully interfaces with MicroMD EMR, which is the next step after we are fully functional on the PM system.”

MicroMD PM will enable AMM members to:

- Reduce paper-based processes;
- Automate claims management;
- Simplify billing methods;
- Make referrals via a Web portal; and
- Streamline access to patient information.

“As practices continue to move toward using EMRs, the need for a strong practice management foundation becomes even more important,” said Ajit Kumar, President and CEO of Henry Schein Medical Systems. “Advanced Medical Management’s selection of Henry Schein Medical Systems as a one-stop provider for both PM and EMR signifies the importance of an integrated approach to addressing their business and clinical needs.”

The AMM groups include Multi-Specialty HealthCare, Harford County Ambulatory Surgery Center and Baltimore Work Rehab.
