HENRY SCHEIN MEDICAL SYSTEMS ANNOUNCES RELEASE OF MICROMD® EMR VERSION 7.0

Boardman, Ohio – May 19, 2009 – Henry Schein Medical Systems, a provider of mature and cost-effective practice management, document management and electronic medical records systems, today announced the release of MicroMD® EMR version 7.0.

“As physician practices nationwide begin to closely examine their existing EMRs or evaluate options for their first system, we are focusing on providing an option that will help them achieve meaningful use and address the most vital needs of their practice—excellent patient care and profitability,” said Ajit Kumar, president and CEO of Henry Schein Medical Systems. “Suitable for practices of any size and numerous specialties, MicroMD EMR 7.0 provides advanced e-prescribing functionality and health maintenance modules that will enable providers to meet quality care guidelines and remain profitable in today’s complex market.”

MicroMD EMR version 7.0 is a qualified e-prescribing system that integrates with RxHub, enabling physicians to access prescription plan eligibility, previously filled prescriptions and formularies of available medications for a patient at the time of service. The system also links to SureScripts® for connectivity to pharmacies nationwide and to First Data Bank for up-to-date drug interaction information and educational materials.

The new release of MicroMD EMR version 7.0 includes several enhancements, including an improved health maintenance module, which will store immunization histories and provide preventative care information. This module will assist providers in better educating their patients and meeting pay-for-performance goals.

Additional enhanced functionality includes:

- Import and export of CCD and CCR health records, displayed as XML records and reports;
- Embedded links to images on PACS systems for additional interoperability; and
- Modifications to the patient routing system, allowing providers to track patient movement throughout the practice as well as wait times.
