

For Immediate Release**INTEGRATED HEALTH SYSTEMS OF ALABAMA SELECTS MICROMD® EMR
FOR 42 COMMUNITY HEALTH CENTER LOCATIONS****EMR Software Will Meet Unique Needs of Community Health Centers,
Improve Workflow and Increase Efficiency**

Boardman, Ohio – September 12, 2008 – Henry Schein Medical Systems, a provider of mature and cost-efficient practice management and electronic medical records (EMR) systems, today announced that Integrated Health Systems of Alabama (IHSA) has selected the MicroMD EMR product to support its network of seven community health organizations, which represents 42 Alabama-based primary care delivery centers and 71 healthcare providers.

“We researched a number of EMR systems and decided to partner with Henry Schein after a site visit to a similarly-modeled community health network where we were able to see what the organization had accomplished by using MicroMD EMR,” said Al Fox, CEO of IHSA. “Additionally, we knew we could expect excellent service and support based on our 25-plus year relationship with Henry Schein and their reliability for medical supplies.”

MicroMD EMR simplifies the entry and presentation of clinical data, resulting in improved workflow and faster access to patient data. The application is tailored to the needs of community health organizations, providing user-friendly UDS reporting and enabling the calculation of sliding fee schedules. By creating electronic patient records and forms, IHSA will reduce paper-based processes and operate more cost effectively.

“Henry Schein’s approach gives our healthcare providers immediate access to patient charts, including test results and encounter notes, so they can expedite the delivery of care and enhance overall safety,” Fox added.

By housing the applications at a main data center, individual care centers will be able to access the software via the Web and ensure that all data and reporting is backed up by the main data center.

“Community health centers are tasked with providing care to underserved communities, which presents a unique set of challenges,” said Ajit Kumar, President and CEO of Henry Schein Medical Systems. “Henry Schein is committed to providing practical, affordable technology solutions that allow community health centers to deliver the highest possible standard of care and ultimately improve clinical outcomes.”

About Henry Schein Medical Systems and Henry Schein, Inc.
