

# MicroMD EMR

## Take the Pain Out of Prior Authorizations

Physicians spend three to eight hours of time per week to process prior authorizations, costing up to ten thousand dollars per physician per year. Pharmacists experience similar challenges.

Patients feel the pain of prior authorization too—often waiting multiple days for a response. Twenty to thirty percent of patients give up entirely.

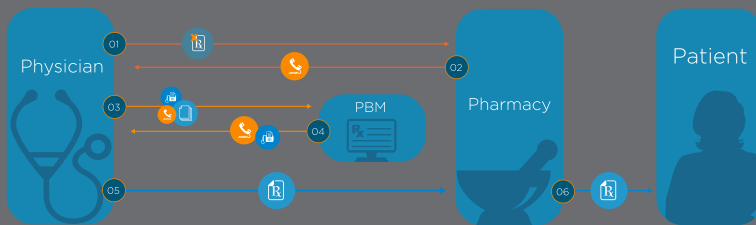

Other solutions on the market have substituted web portals in place of phone calls and faxes, calling their service electronic prior authorization, but the result isn't any faster for the patient and only marginally better for the physician and pharmacist.

### Comparison Chart

	MicroMD EMR	Other Electronic Prior Authorization Solutions
Prior authorizations automatically routed to health plan	yes	no
Real-time health plan responses delivered to the EHR	yes	no
Forms auto-populated with patient demographics	yes	no
Only relevant questions required	yes	no
Fully electronic submission (no faxes, portals)	yes	no
Complete EHR integration	yes	no

Our electronic prior authorization solution integrates directly with the EHR and presents physicians with patient and health plan-specific questions automatically. Other solutions force physicians to leave the EHR and log in to a web portal to begin the prior authorization process.

### Traditional prior authorization is complex and time-consuming

### Electronic prior authorization simplifies the process

### Connected to the Largest Number of Health Plans

We connect to the vast majority of U.S. PBMs via the Surescripts network to provide the most immediate and highest quality data representing 225 million unique patients.

### Real-time Prior Authorization Responses

Physicians get a real-time prior authorization response before the patient leaves the office, pharmacists get fill-ready prescriptions they can dispense and patients can pick up prescriptions without delay.

### The Right Prior Authorization Questions Every Time

Our solution presents physicians with patient and plan-specific questions automatically. What's more, patient data is pre-populated, eliminating the need to complete prior authorization forms manually.

### Truly Automated Electronic Prior Authorization

All requests are sent directly to the health plan electronically, eliminating the need for faxing and phone calls.

### Work within the EHR Platform

Our electronic prior authorization solution integrates with the EHR and e-prescribing workflow, eliminating the need for users to leave the EHR platform.

### Don't get Stuck with an Inferior ePA Solution

Contact us to discuss how our electronic prior authorization solution can work for you.
