MicroMD and ReportingMD

MicroMD has partnered with ReportingMD to offer the ReportingMD Total Outcomes Management (TOM) application.

TOM is a population health application for managing day to day clinical performance. Achieve superior outcomes for PQRS, ACO, HEDIS/STARS, PCMH and the Quality performance category under the 2017 Merit-Based Incentive Payment System (MIPS) with TOM’s drill-through reporting.

Now you can use TOM for optimal patient care and maximize your pay-for-performance incentive programs through our single sign-on. It just takes 1 click from within a patient record to manage your gaps in care in TOM.
Benefits of the ReportingMD TOM application

**Total Outcomes Management**

- Manage disease outcomes
- Manage patient population health
- Identify care gaps
- Optimize performance rates
- Achieve superior patient outcomes
- Enhance patient care
- Single Sign on from MicroMD
- PQRS, ACO, PCMH, MIPS: Quality

- Secure data reporting
- Manipulate your data using ReportingMD’s power grid
- Measure driven analytics
- Patient severity indexing
- Powerful drill-through reporting
- Greater access to reporting with cloud-based services
- All measures reportable
- Custom reporting
