 Live Webinar

New Year's Resolutions = Smarter Solutions

Today's webinar is sponsored by:

**Simple. Customizable.
Connected.**

**Simple, highly customizable software
to help you run your practice,
and connect with your patients.**

Webinar Tips for Attendees

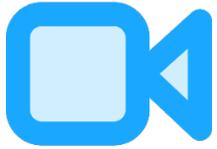

Questions

You can submit a question anytime by using the “Question” area of your control panel. We will reserve time for Q&A at the end of the session.

Audio

Your audio will be streaming through your computer speakers.

Recording

After the webinar ends, registrants will receive a notification through email with a URL link of the recording for on-demand viewing.

Virtual Care Market Trends

REMEMBER: WE STARTED AT (ALMOST) ZERO

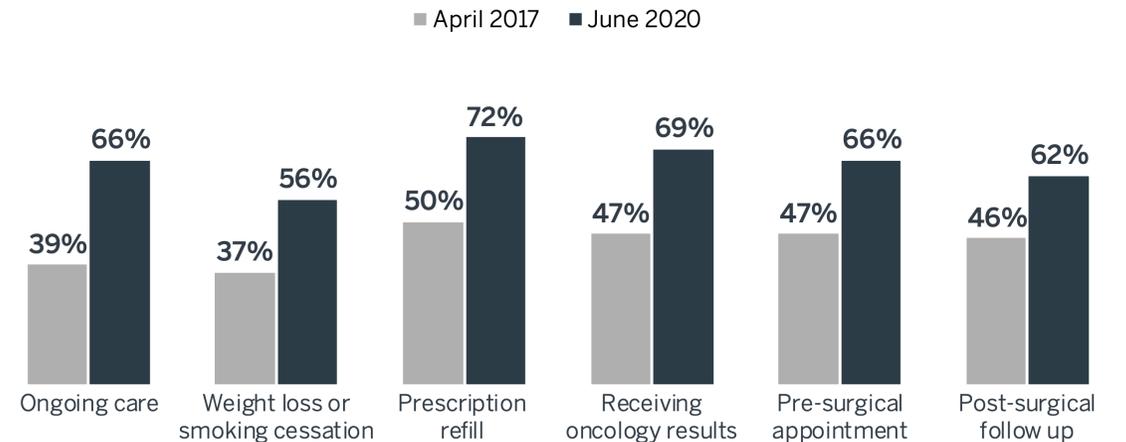

Telehealth visits as percentage of total visits

- Pre-2019 telehealth visit were nominal
- 2020 Covid shutdowns drove 52% peak utilization
- 2021 stats show steady 15% + utilization that is here to stay

CONSUMERS WHO WOULD CONSIDER VIRTUAL CARE IN DIFFERENT SCENARIOS

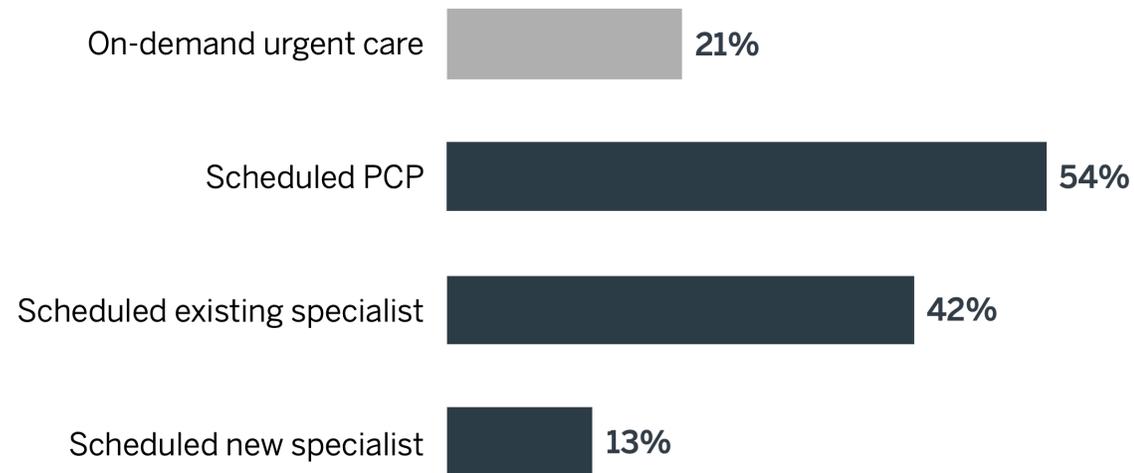

n=7,452

Telehealth

Your practice's
Telehealth strategy
addresses 2 of the 3
consumerism factors
- Convenience & Cost

6 Billion

in annual savings
To remain competitive
every practice should include
telehealth in their patient
journey.

Pandemic – impact of Telehealth

41% of patients say they lost confidence in their doctors during the pandemic

29% because of their providers' slow adoption of virtual care

53% Their provider rarely or never communicated with them about Covid-19.

24% because their providers did not take sufficient advantage of digital communication tools

Conversely,

59% of respondents who said their confidence in their providers increased amid the pandemic,

61% credited that boost to their providers' rapid switch to virtual care

58% credited the frequency of their providers' Covid-19 communications

47% credited their providers' use of digital communication tools, such as text and email.

Telehealth – virtual visits

Of the 19% of consumers who tried a virtual visit for the first time during the pandemic,

47% were Baby Boomers

60% of all consumers would consider a virtual visit if they had to wait at least a day to see their regular provider in person.

VIDEO ONLY

A direct to patient video consultation service for practitioners that's fully browser-based for easy virtual consultations — anytime, anywhere.

MOBILEDOC®

Robust professional tele-diagnostic capabilities packed into a carry-on bag. It's the ultimate portable practice.

STREAMLINE CART

Our streamlined medical cart enables high-quality, remote physician-patient encounters on par with a face-to-face visit, all with best-in-class tele-diagnostic devices.

SMART POWERED CART

For inbound patient applications, Medpod enables providers to break down the barriers of traditional care delivery and create new care pathways.

REMOTE PATIENT MONITORING

Anytime, anywhere chronic care for either post acute or inpatient monitoring as part of a value-based health care program.

LIVE TRANSLATION SERVICES

Remote video translation maintains high-level patient care with visual communication.

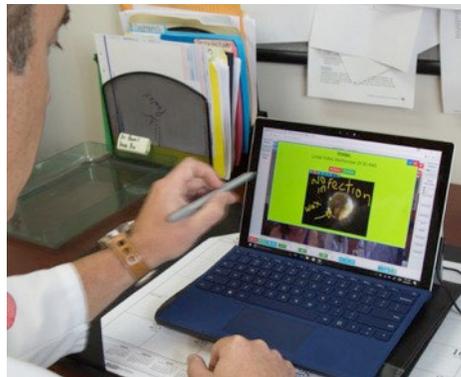

PORTABLE TRIAGE CENTER Transforming Frontline Care

Setup an 8'x12' triage/exam room anywhere with a 110v connection or generator.

Medpod enables high-quality remote physician-patient encounters that are on par with a physical visit and are reimbursable as such in states with telemedicine parity laws.

Local provider using otoscope on patient with remote physician on live audio video consult

Remote physician annotating the otoscope image.

Professional Telediagnostics

VITALS	VISION	PACS
STETHOSCOPE	RETINOPATHY	ABI
EXAM CAMERA	ULTRASOUND	COLPOSCOPE
EKG	BONE DENSITY	DENTAL
SPRIOMETRY	HEARING SCREENING	CONCUSSION TESTING

POC LAB Tele-diagnostics

HORIBA MICROS 60 Hematology	QUIDEL TRIAGE Cardiac, Toxicology
ABBOTT PICCOLO XPRESS Chemistry	URISPEC PLUS Immunology
ABBOTT I-STAT Blood Analysis	CARDIOCHEK PLUS Chemistry
TOSOH AIA-360 Immunology	PTS A1CNOW Diabetes

- Integration with practice's schedule –
 - Patient specific virtual waiting room links sent to the patient
 - Integration with Digital patient intake tools to automate history and medical data collection, insurance and ID's, consent signatures and co-pay collection
- Bandwidth Correction – improved stable connectivity
- Enhanced Security and consent tools
- On screen patient guidance for a successful visit.
- Virtual links by email or text
- Integrated translation services
- Virtual Group visits – ability to invite up to 9 participants.
- Designed to work along side your EMR but capable if needed to record vitals, simple notes, capture images & download to EMR

Questions you should ask about Virtual Health solutions

VIDEO ONLY

- Does your telehealth solution allow you to scale from software-based video visits to level 5 billable tele-diagnostics and RPM?
- Does your Telehealth video solution provide advanced communication tools, does it allow flexible workflow where nurses and staff can engage with patients on video just like they would in the office?
- Are you leveraging your most expensive assets to provide true diagnostic virtual care while increasing patient access and practice revenue?
- Can the system capture real-time diagnostic data that connects to your EHR?
- Does the system allow you to provide virtual episodic, chronic and acute care?

2022

Speech Recognition - Industry Update

Jeremy Vicedomini,
Speech Recognition Product Champion
Nuance Healthcare Channel Manager

Requirements for documenting patient care

Supporting clinical documentation and driving quality patient care

Clinicians are overwhelmed by documentation and quality requirements:

of a doctor's workday is spent on data entry

12,138 steps

healthcare professionals take 2.3 times more steps per day than the average American

of all Medicare payments to be tied to quality or value by 2018

4,000 clicks for an average day of documentation

of doctors use a personal mobile device to communicate patient data

1/6 of day spent on administrative tasks—billing, financial management, and more

7.2 million words documented by a single doctor in just one year

of CIOs say portability is a key priority

of doctors report being moderately or severely stressed

Creating a World where Clinicians Take Care of Patients without Technology Getting in the Way

Speech Recognition –
why cloud is better

All new –
Speech Activated Calculations
using MDCalc

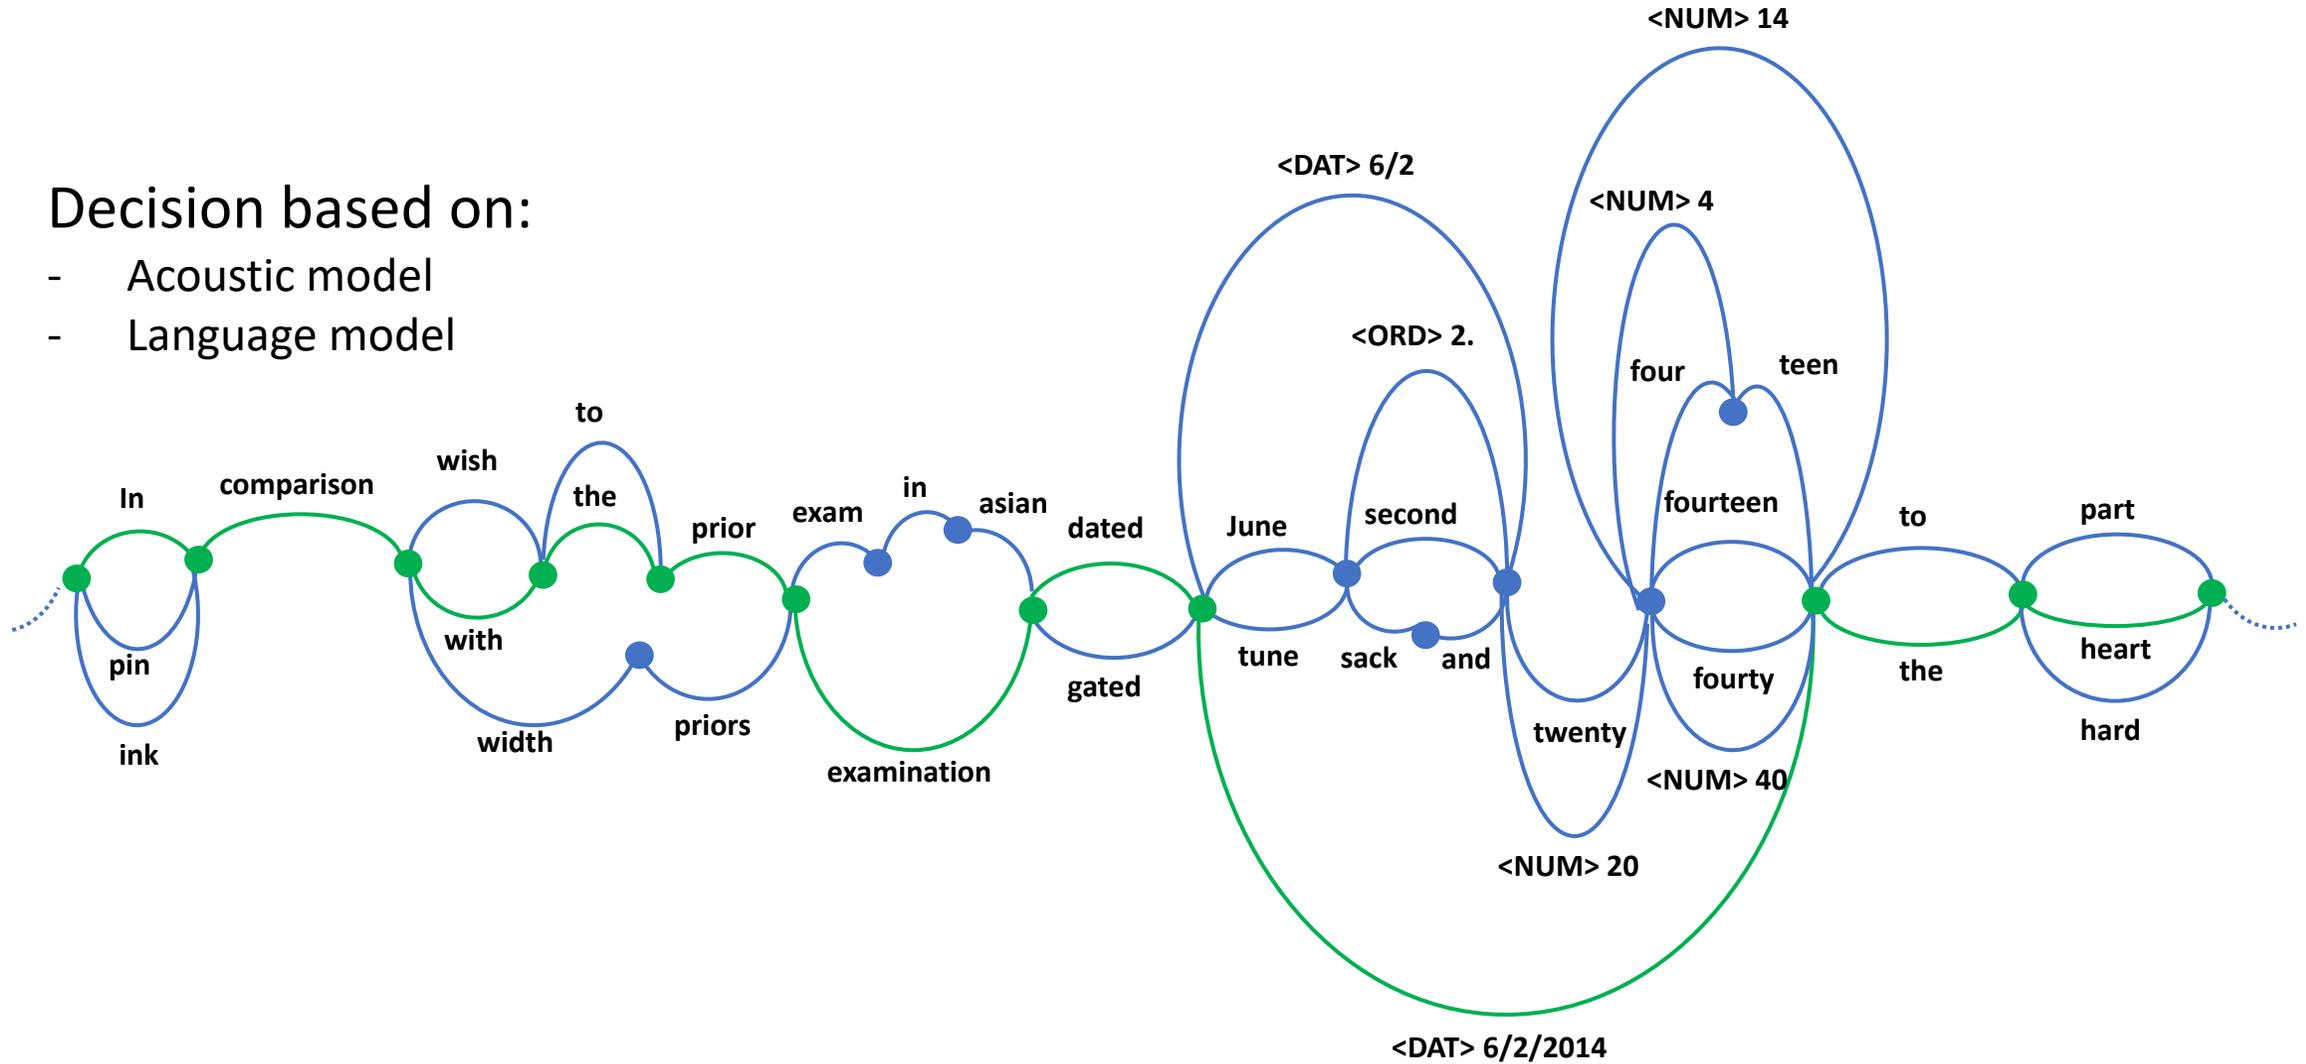

Input Example:

“In comparison with the prior examination dated June second twenty fourteen the heart...”

Previous Model

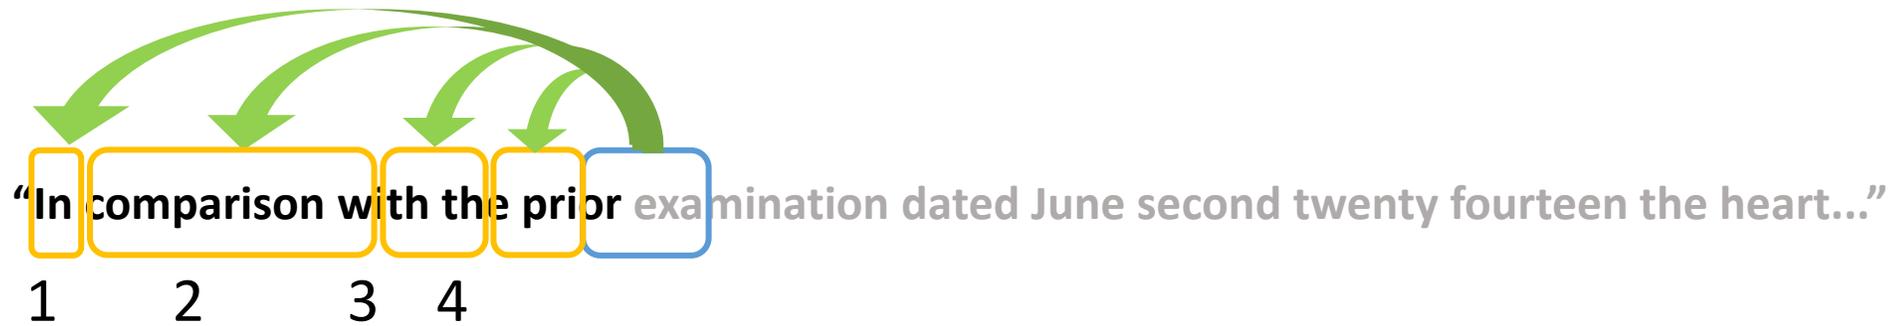

Decision based on:

- Acoustic model
- Language model

Previous Model

Context check that reached back to up to 4 words

Previous Model

Not possible to check the context of the whole sentence

Outcome dependent on the last (up to) 4 words

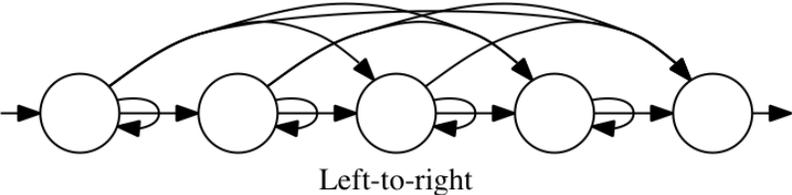

“In comparison with the prior examination dated June second **twenty fourteen the heart...**”

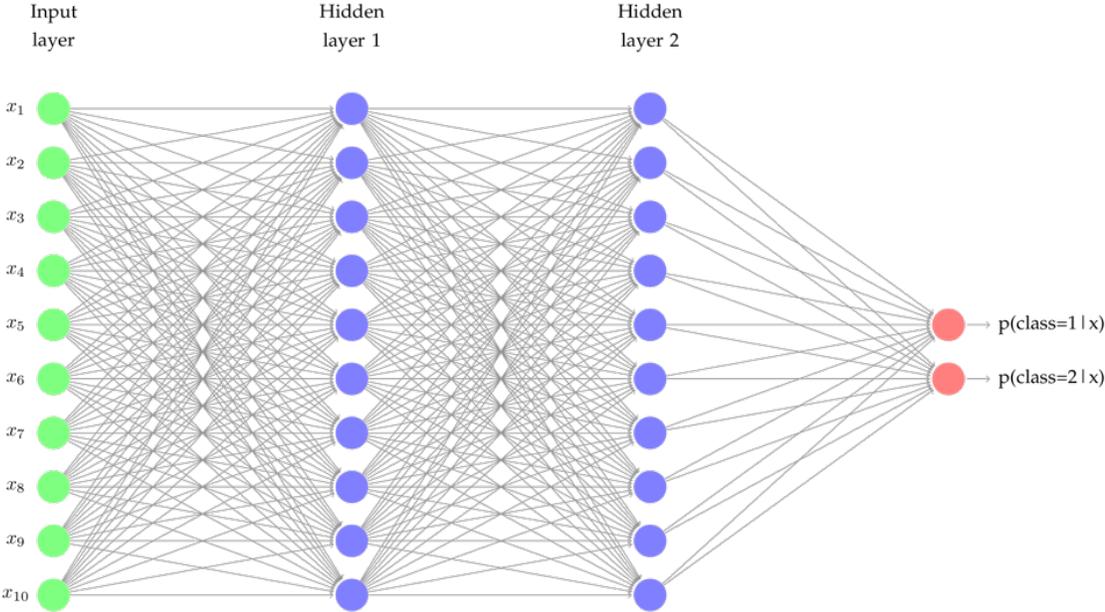

Neural networks

Higher capability to cross check results

Previous Model:

New Model:

New Neural Network Model

More context, more scale, more accuracy

Outcome no longer dependent on only 4 previous words

“In comparison with the prior examination dated June second twenty fourteen the heart...”

PowerMic 4

High-quality physician dictation microphone with PC mouse functions

Enhance productivity with ergonomic control of both standard dictation and speech recognition functions

USB connectivity for easy plug-and-play installation as well as eliminating the need for sound card-enabled PCs

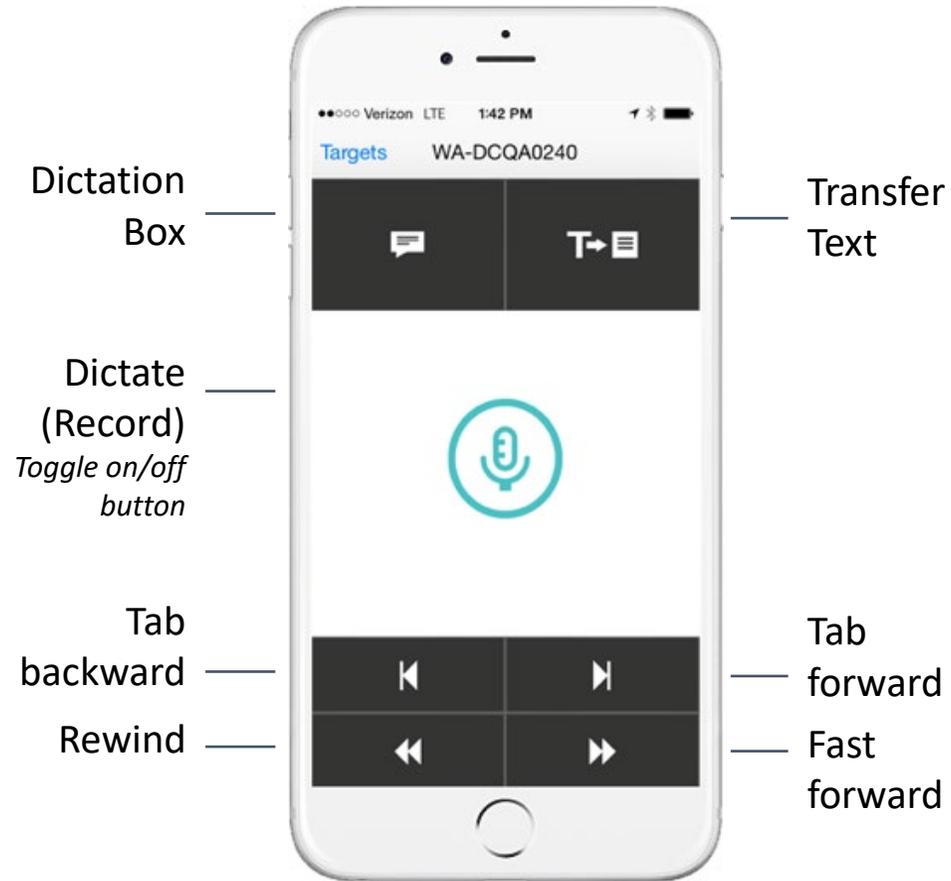

Unidirectional microphone with noise-cancellation ensures higher accuracy in even the noisiest environments

Perfect companion to PowerMic Mobile, which turns smartphones into secure wireless microphones

Support individual clinician preferences and workflows by offering a mix of PowerMic 4 and PowerMic Mobile

PowerMic Mobile

Secure wireless microphone for iPhone and Android

Turn any workstation into a Dragon Medical One documentation station

Can be used with any thin or zero client infrastructure and offers an optimized audio channel for true portability and reliability

Centrally managed with full MDM support, including VMWare AirWatch, MobileIron, Cisco Meraki, Sophos and others

Multiple organization and multi-workstation support with automatic workstation pairing

No passwords to remember, authenticates based on Dragon Medical One login

Customizable with up to 5 programmable buttons

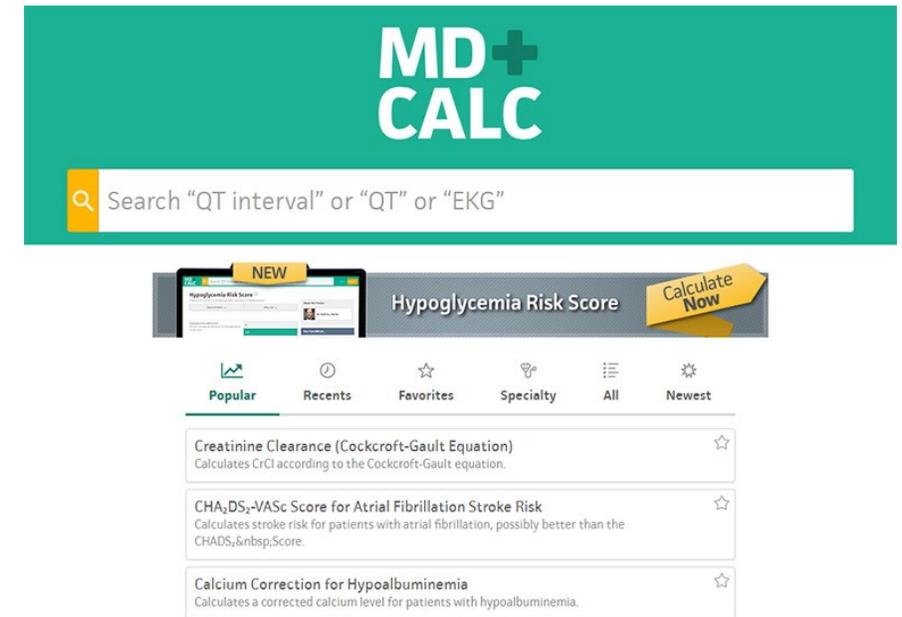

Can be used in conjunction with PowerMic III

MDCalc integration has arrived

Clinical decision support is an essential part of the clinician workflow. Whether determining appropriate dosing, calculating a risk score, or referencing diagnostic criteria—MDCalc tools support over 50 specialties, 200 patient conditions, and 650 calculators. Used by millions of medical professionals worldwide, MDCalc is proven to achieve better patient outcomes by providing evidence-based criteria when diagnosing, documenting, or developing a care plan.

*DMO V2021.4 or later

*MDCalc is integrated with DMO

Outcomes through EHR optimization

Combining Dragon Medical One with EHR capabilities

41% More Productive in EHR

Dragon Medical One vs Non-Dragon Medical One

EHR Documentation Speed

Why Dragon Medical One?

Unsurpassed speech recognition accuracy across medical specialties

-
- Up to **99%** **accurate** out-of-the-gate

Automated optimization, **no voice profile training, automatic accent detection** and **automatic microphone calibration**—optimal clinician experience from the start that continues to improve over time.

 - 30% less errors** than other platforms

Advanced technology—**recurrent neural net (RNN)** acoustic models and **deep neural net (DNN)** language models—result in **30% less errors** than other platforms.

 - 38% greater** specialty coverage

Optimized for **90+ medical specialties**—**38% greater coverage** over other platforms.

eRx Mandates & Industry Update
Surescripts & Dr. First

Unique healthcare professionals & provider organizations connected

Note: Some individual providers have multiple provider IDs assigned by different states or software vendors. In 2021, our provider directory contained 2.17 million provider IDs.

E-prescriptions for controlled substances filled

Where is e-prescribing required by law?

A Centers for Medicare & Medicaid Services (CMS) rule requiring that Part D providers use EPCS took effect January 1, 2021 (pursuant to the requirements of the SUPPORT for Patients and Communities Act), and state legislation continued moving forward throughout the year.

3 states passed mandates in 2021.

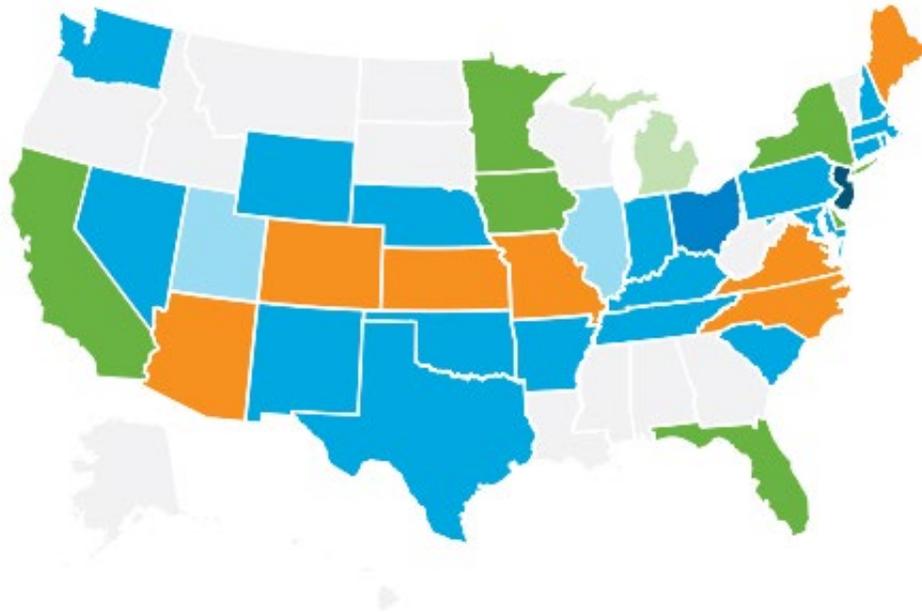

14 states had mandates take effect during 2021.

6 states had mandates take effect on January 1, 2022.

32 states have mandates in effect as of January 2022.

35 total states have now passed e-prescribing mandates.

75% of the U.S. population lives in states with mandates in effect.⁶

As of January 2022

- Currently required for all prescriptions
- Will be required for all prescriptions
- Currently required for all controlled substances
- Will be required for all controlled substances
- Currently required for some controlled substances (e.g. opioids, or all but Schedule V substances)
- EHR EPCS adoption required
- Legislation in progress

Requirements in Indiana and Washington were postponed to January 1, 2022. Michigan's requirement was postponed to January 1, 2023.

**COMPLIANCE DATE
